

## ITEGRIA AdvisorCloud VDI

July 2019

Total AdvisorCloud™ Virtual Desktop Infrastructure (TAC VDI) is a leading-edge, 100% cloud-based network infrastructure technology delivered through a familiar desktop experience, enabling fully personalized virtual desktops for each McCarthy Grittinger team member, with all the security and simplicity of centralized management for our firm.

### Total AdvisorCloud VDI Benefits

- Our firm's data is hosted on a private, secure, compliant cloud network.
- Data can be accessed from anywhere on virtually any device (PC, Macbook, iPad, Android, Chromebook, etc.), so our team members aren't tied to a specific location or device.
- Data does not reside on any physical devices. Therefore, if we do not have access to our office, or a true disaster occurs, we can continue to service our clients seamlessly. Team members can securely access all data remotely in the same fashion as they do within the office.
- Robust defense tools such as multi-factor authentication, internet web content filtering, and vulnerability management ensure that cybersecurity is a top priority.
- Data can only be accessed within the secure, compliant TAC VDI platform. Physical devices are "dummy terminals" and do not maintain any data at all.

### Frequently Asked Questions

- **Where is my data?** McCarthy Grittinger company tools, applications and files reside in ITEGRIA's (our technology solution provider) highly resilient, redundant, compliant and secure data centers. No tools or data are installed on PCs.
- **How is my data be secure?** ITEGRIA implements a rigorous vulnerability management program (as well as many defense technologies such as multi factor authentication, antivirus, web content filtering, etc.) to ensure that your information is always secure.
- **What happens if there is a disaster?** In the event of a disaster, there is no impact whatsoever in our ability to service our clients. As long as our team members have a safe location with a device and a reliable internet connection, they can access all of our company tools, applications and files that they normally do in the office.
